

eKOVER

basaltic insulation

MANUFACTURER

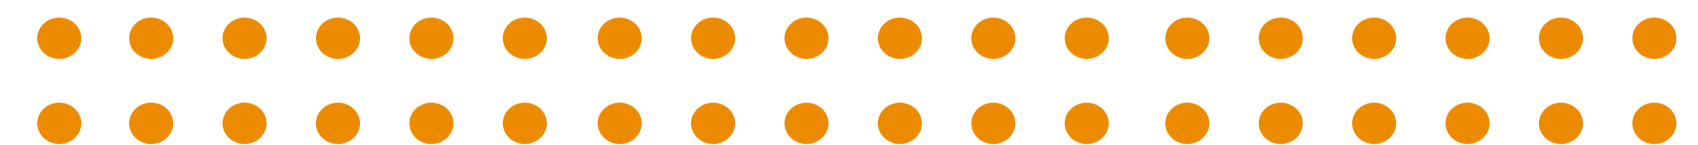

EKOVER® Company is a modern high-tech manufacturer of the effective heat and sound insulation materials, based on rock (gabbro and basalt) wool.

The manufacturer is located near the deposits of high quality raw materials in the city of Asbest, Sverdlovsk region, Russia.

The company produces more than **60 types of insulation** under the brand name EKOVER®. Our products have a variety of characteristics and come in different sizes, to satisfy any demand and insulate any building structure.

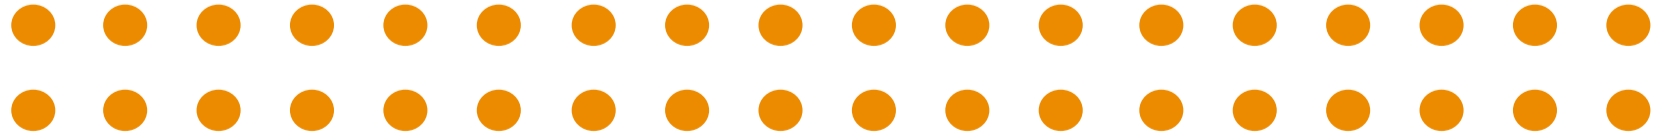

The EKOVER® factory produces up to 90 000 tons of materials per year.

EKOVER® Company manufactures world-class quality products, comparable with the best world producers.

THE BAZHENOVSK DEPOSIT

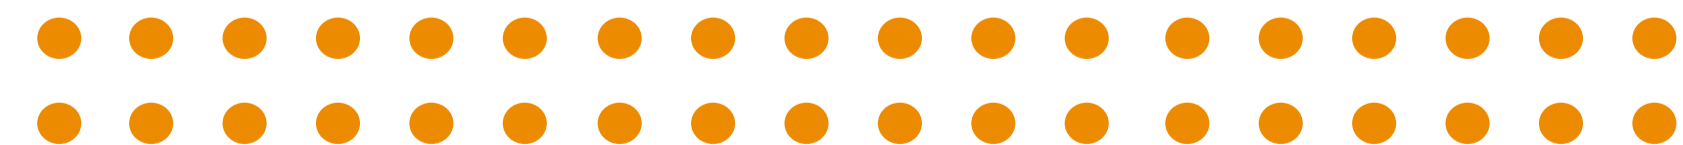

The raw materials for the production of mineral wool insulation EKOVER® - are rocks of the gabbro-basalt group, mined in the quarry of the Bazhenovsk Deposit. This deposit is the largest and richest in the world.

MANUFACTURING FACILITIES

The EKOVER® factory has its own raw deposits and required resources to produce insulation materials with the best technical characteristics.

- The raw material – gabbro rocks from the Bazhenovsk Deposit quarry (Sverdlovsk region, Russia)
- The factory is equipped with a modern production line that is run by fully automated technological process
- The EKOVER® Company's testing laboratory, as a part of the quality service, is accredited for technical competence and provides independent testing researches at all stages of production: from input control of raw materials to final products' certification

SAVING ENERGY. TAKING CARE OF NATURE

Basalt insulation is one of the most effective and environmentally friendly insulation materials

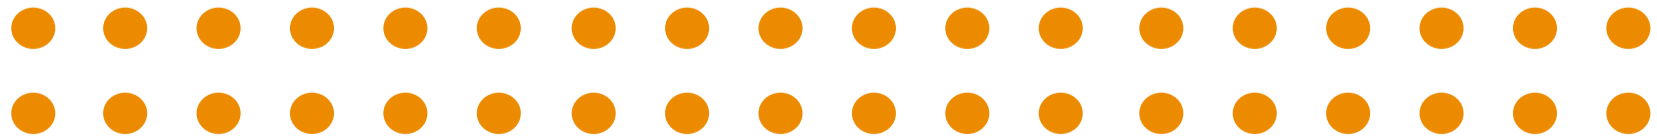

Insulation is made from environmentally friendly natural raw materials in compliance with all modern requirements

The applying of effective EKOVER® basalt insulation significantly reduces the level of energy resources consumption and, as a consequence, the impact on the climate of our planet

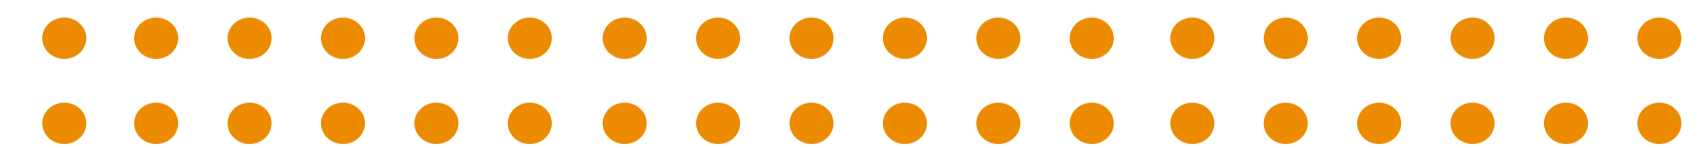

The production is equipped with an effective cleaning system that prevents the release of harmful substances into the atmosphere

PRODUCT RANGE

| | | |
|------------------------------|---|--|
| CIVIL INSULATION | EKOVER® LIGHT UNIVERSAL EKOVER® LIGHT EKOVER® STANDARD | FOR HEAT INSULATION OF ANY FRAME STRUCTURES |
| ACOUSTIC INSULATION | EKOVER® ACOUSTIC, ACOUSTIC COMPACT EKOVER® STEP EKOVER® STEP OPTIMA EKOVER® STEP PLUS | FOR SOUND INSULATION OF FRAME STRUCTURES AND "FLOATING FLOOR» |
| FACADE INSULATION | EKOVER® EKOFACADE EKOVER® EKOFACADE OPTIMA EKOVER® EKOFACADE STANDART EKOVER® FACADE-DECOR EKOVER® FACADE-DECOR OPTIMA EKOVER® FACADE-DECOR LAMEL EKOVER® VENT-FACADE | FOR HEAT AND SOUND INSULATION OF PLASTER AND VENTILATED FACADES |
| ROOF INSULATION | EKOVER® KROVLYA VERH EKOVER® KROVLYA NIZ EKOVER® KROVLYA | FOR HEAT AND SOUND INSULATION OF FLAT ROOFS (SINGLE-LAYER AND DOUBLE-LAYER INSULATION) |
| INDUSTRIAL INSULATION | EKOVER® SANDWICH C EKOVER® SANDWICH K EKOVER® SEGMENT | FOR PRODUCTION OF WALL AND ROOF SANDWICH PANELS, PIPE AND ENGINEERING INSULATION |
| TECHNICAL INSULATION | EKOVER® OGNEZASCHITA BETON EKOVER® OGNEZASCHITA METALL | FOR FIRE-RESISTANT LINING OF REINFORCED CONCRETE AND METAL STRUCTURES |
| SUBSTRATE FOR GROWING PLANTS | EKOVER GROUND (PLUGS, CUBES, MATES) | FOR GROWING VEGETABLE AND FLOWER CROPS |

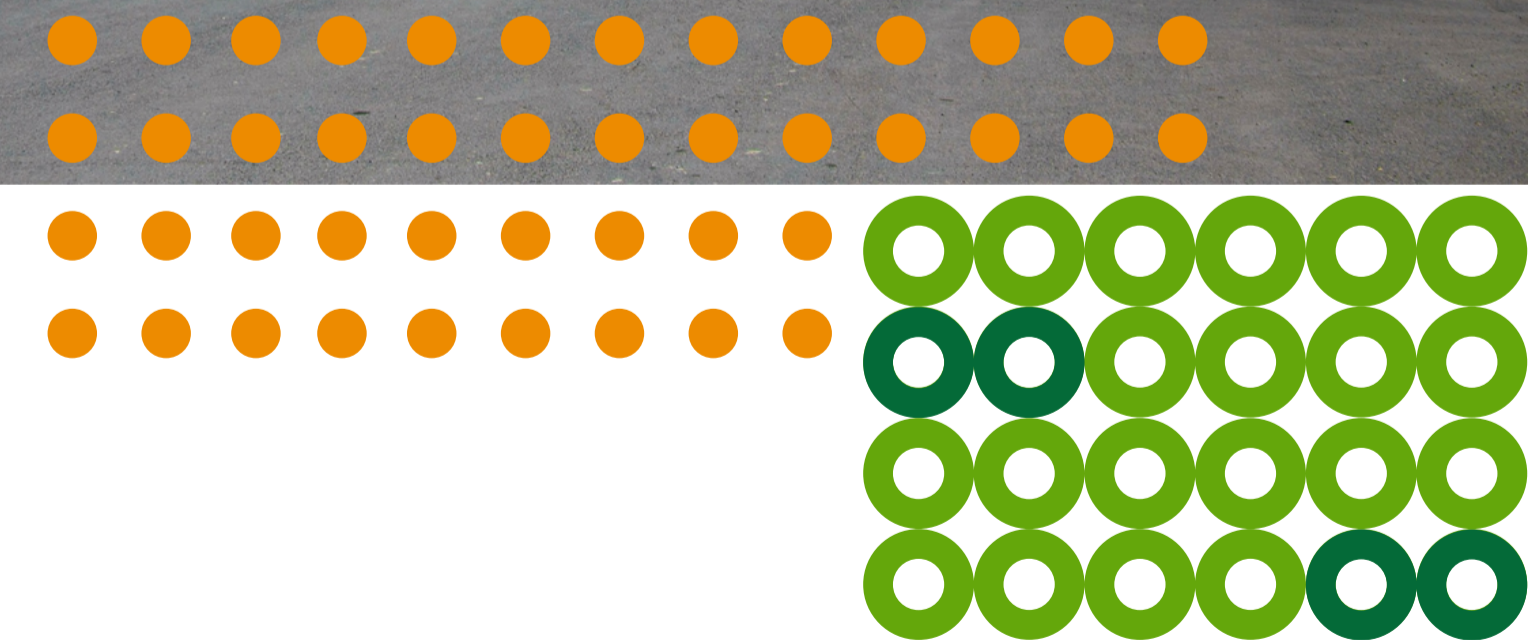

DISTRIBUTION

The EKOVER® Company sells products only through its authorized dealers. The wide geography of sales and the developed dealer network allows to carry out distribution across all territory of the Russian Federation and neighboring countries.

The main advantages of partnership with the EKOVER® Company:

- stable high quality of products
- logistics service (shipment control at all stages)
- profitable conditions
(storage and business processes optimization programs)
- marketing and advertising support of trading partners
- competence and politeness of specialists

ekover basaltic insulation

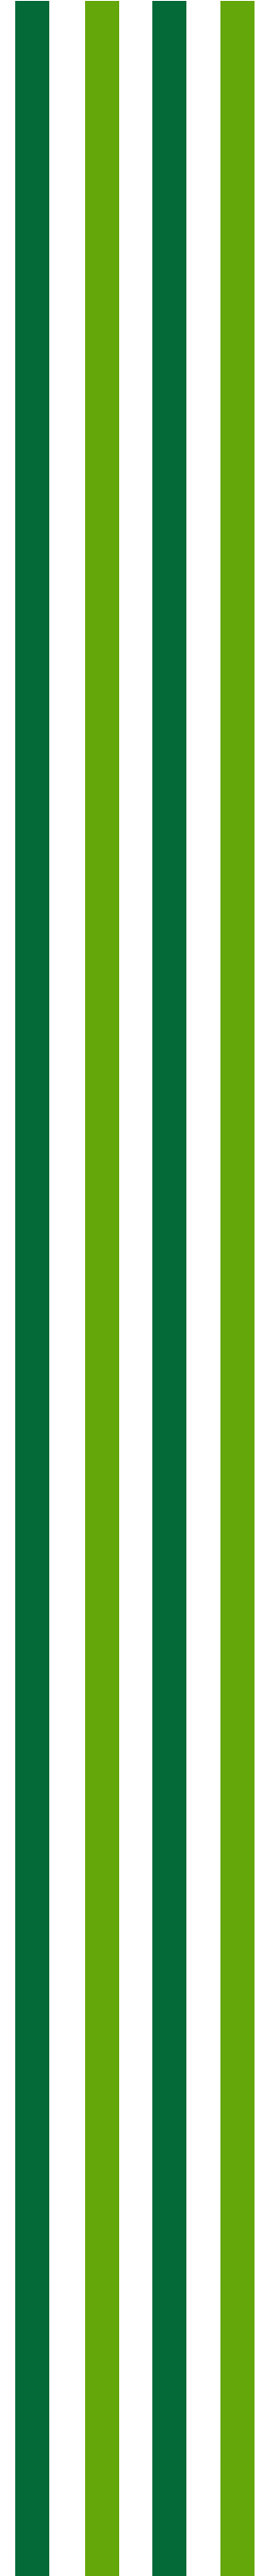

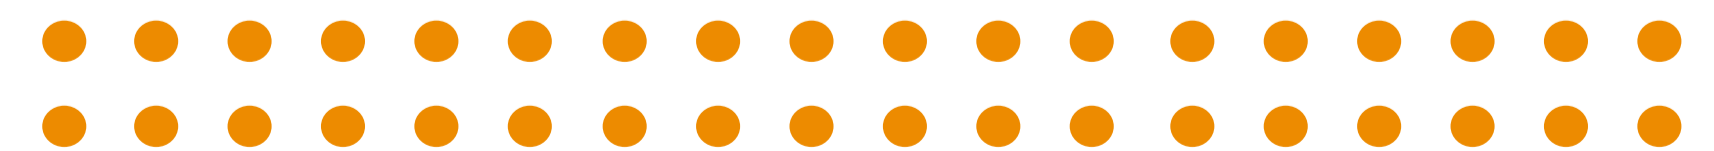

BUILDINGS

The EKOVER® range includes both general construction products for heat and sound insulation of external walls, roofs, floors, floor coverings and internal partitions, and products for industrial and civil construction, for fire protection, thermal insulation of equipment.

Unique characteristics of basalt insulation EKOVER® is due to the properties of the raw materials, as well as the technology of obtaining fiber and products.

Buildings with the applied EKOVER® can be found throughout Russia and the CIS.
